

## Hunters

When carrying out our screening duties at the airport, TSA routinely encounters rifles, bows and arrows, knives and other items used by sportsmen and hunters. Please take a moment to become familiar with some of our security measures. Doing so now will help save you time once you arrive at the airport.

### Before the Airport

- Do not pack or bring Prohibited Items to the airport. Check your bags **for loose ammunition or casings** before you begin to pack.
- Pack travel-size containers less than 3.4 ounces comfortably in one, quart-size plastic, zip-top bag.
- Place valuables such as jewelry, cash and laptop computers in **carry-on baggage only**. Tape your business card to the bottom of your laptop.
- Avoid wearing clothing, jewelry and accessories that contain metal. Metal items may set off the alarm on the metal detector and/or Advanced Imaging Technology (AIT)
- Pack your medications in your carry on bags
- Declare firearms & ammunition to your airline and place them in your checked baggage.
- If you wish to lock your baggage, use a TSA-recognized lock.
- Packaged meat/game & other non-liquid food items are permitted in both carry-on and checked bags. If the food is packed with ice or ice packs in a cooler or other container, the ice or ice packs must be completely frozen when brought through screening. If the ice or ice packs are partially melted and have any liquid at the bottom of the container, they will not be permitted. You also can pack frozen perishables in your carry-on or checked bags in dry ice.
- The FAA limits you to 5.5 pounds of dry ice that is properly packaged (the package is vented) and marked. Airline approval is required.

## Passenger Support

Items that may require special accommodations or concerned about the security screening process at the airport may ask a TSA officer or supervisor for a passenger support specialist who can provide on-the-spot assistance.

## At the Airport

Adult passengers 18 and over must show valid identification at the airport checkpoint in order to travel. Refer to [www.TSA.gov](http://www.TSA.gov) for acceptable forms of ID.

As you know, standard screening requires that you remove all items and place them on the X-ray belt for screening. With TSA Pre<sup>✓</sup>, you are able to speed through security and don't need to remove your shoes, laptops, liquids, belts and light jackets.

## Passenger Security Checkpoints

Unless you are TSA Pre<sup>✓</sup>, you will need to remove your shoes, remove your 3-1-1 compliant liquids and personal electronic devices larger than a cell phone such as laptops, tablets, e-readers and handheld game consoles, from your carry-on bag and place them into a bin with nothing placed on or under them for X-ray screening. In addition to screening personal electronic devices separately, TSA officers may instruct travelers to separate other items from carry-on bags such as foods, powders, and any materials that can clutter bags and obstruct clear images on the X-ray machine. Also, ensure that your pockets are empty (keys, tissues, currency, wallets, cell phones, etc.) and remove bulky jewelry before entering the screening process. Valuable items can be placed in your carry on bags.
